

## **Thorner's sustainable palm oil statement**

### **We are a Champion for the Dorset Sustainable Palm Oil Community**

At Thorner's Primary School we have committed to participate in the Dorset Sustainable Palm Oil Community project.

By July 2023 we will have worked with our suppliers to ensure that where palm oil is present in our food and other resources used in school, it will be from sustainable sources. Our school lunch partners 'Local Food Links' are already committed to the use of only sustainable palm oil where palm oil is present in the meals provided. We understand how ecologically damaging palm oil production can be and as such we are very happy to have joined the Dorset Sustainable Palm Oil Community Project.

We will continue to remain vigilant towards the use of palm oil in any foods and resources used within school. By reducing our palm oil use and ensuring any palm oil used is sustainably sourced, we will be helping to protect wildlife around the world from the impact of unsustainable agricultural practices.
