

Year Group Expectations: Year 4

| | | | | | | |
|---|--|---|---|---|--|---|
| 5 | <ul style="list-style-type: none"> Use their developing scientific knowledge and understanding and relevant scientific language and terminology to discuss, communicate and explain their observations (incl. more abstract ideas from Y5 PoS (e.g. friction, air resistance, forces, Earth and space, reversible and irreversible changes). Evaluate their observations and suggest a further test, offer another question or make a prediction Observe (including changes over time) and suggest a reason for what they notice | <ul style="list-style-type: none"> Suggest reasons for similarities and differences Compare and contrast things beyond their locality and use these similarities and differences to help to classify (e.g. features of animals, life cycles of different living things, melting compared with dissolving, etc). Use secondary sources of information to identify and classify. Decide which sources of information (and/or equipment and/or test) to help identify and classify | <ul style="list-style-type: none"> Recognise scientific questions that do not yet have definitive answers. (linked to Y5 PoS) Refine a scientific question so that it can be tested e.g. 'What would happen to... if we changed...?' Decide whether their questions can be answered by researching or by testing Independently ask their own scientific questions taking some ownership for finding out the answers | <ul style="list-style-type: none"> Find out how scientific ideas have changed/developed over time (linked to Y5 PoS) Articulate and explain findings from their research using scientific knowledge and understanding (see 'Communicating' box below re vocabulary) Make decisions about which information to use from a wide range of sources | <ul style="list-style-type: none"> Perform / create simple models to exemplify scientific ideas using scientific terminology where appropriate (e.g. spheres to represent movements of the Sun and Earth, solar system models, shadow clocks, a simple lever or mechanism). | <ul style="list-style-type: none"> Propose their own ideas and make decisions with agreement in a group Support, listen to and acknowledge others in the group e.g. Yes. I prefer that one too Check the clarity of each other's suggestions e.g. are you saying you think this one is a herbivore? Build on / add to someone else's idea to improve a plan or suggestion Understand that it is okay to disagree with their peers and offer a reasons for their opinion |
| 4 | <ul style="list-style-type: none"> Suggest their own ideas on a concept and compare these with what they observe / find out. Use observations to suggest what to do next Discuss ideas and develop descriptions from their observations using relevant scientific language and vocabulary (from Y4 PoS) Observe and record relationships between structure and function or between different parts of a processes (linked to Y4 PoS) Observe and record changes /stages over time (linked to Y4 PoS) | <ul style="list-style-type: none"> Make a simple guide to local living things. Use guides or simple keys to classify / identify [animals, flowering plants and non-flowering plants]. Use their observations to identify and classify Begin to give reasons for these similarities and differences. Record similarities as well as differences and/or changes related to simple scientific ideas or processes or more complex groups of objects/living things/events (e.g. evaporation and condensation, different food chains, different electrical circuits) | <ul style="list-style-type: none"> Ask/raise their own relevant questions with increasing confidence and independence that can be explored, observed, tested or investigated further Ask questions such as 'What will happen if...?' or 'What if we changed...?' (linked with Y4 PoS) Choose/select a relevant question that can be answered [by research or experiment / test]. | <ul style="list-style-type: none"> Make decisions about which information to use from a wide range of sources and make decisions about how to present their research Recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations. | <ul style="list-style-type: none"> Make a visual representation or a model of something to represent something they have seen or a process that is difficult to see. Suggest their own ideas on a concept and compare these with models or images. | <ul style="list-style-type: none"> Make some decisions about an idea within a group (e.g. I think we should find out by testing...) Increasingly support, listen to and acknowledge others in the group Build on / add to someone else's idea to improve a plan. Understand that it is okay to disagree with their peers and offer reasons for their opinion |
| 3 | <ul style="list-style-type: none"> Observe and record relationships between structure and function (linked to Y3 PoS) Observe and record changes /stages over time (linked to Y3 PoS) Explore / observe things in the local environment / real contexts and record observations (linked to Y3 PoS) – see 'Communicating' section also re links to vocabulary | <ul style="list-style-type: none"> Decide ways and give reasons for sorting, grouping, classifying, identifying things/objects, living things, processes or events based on specific characteristics Compare and contrast and begin to consider the relationships between different things (e.g. structures of plants, functions of plant parts, diets, skeletons of humans and other animals, changes over time, etc.) Record similarities as well as differences (e.g. what do all skeletons have? as well as the differences between skeletons | <ul style="list-style-type: none"> Explore their own ideas about 'what if....?' scenarios e.g. humans did not have skeletons. Ask questions such as 'What if we tried....?' or 'What if we changed...?' Begin to understand that some questions can be tested in the classroom and some cannot. Within a group suggest questions that can be explored, observed, tested or investigated further Within a group suggest relevant questions about what they observe and about the world around them. | <ul style="list-style-type: none"> Find things out using a range of secondary sources of information (e.g. books, photographs, videos and other technology) | <ul style="list-style-type: none"> Act out or make a model of something to represent something in the real world using appropriate scientific vocabulary verbally. | <ul style="list-style-type: none"> Begin to make some decisions about an idea within a group from a list of choices (e.g. let's put them all in a pile first OR I think we should try) With help; support, listen to and acknowledge others in the group (e.g. Yes. I prefer that one too) Build on / add to someone else's idea. (e.g. we could use x and as well as y) Begin to understand that it is okay to disagree with their peers and offer a reason for their opinion |
| | <p>EXPLORING / OBSERVING UKS2 - developing a deeper understanding of a wide range of scientific ideas and encountering more abstract ideas LKS2 - developing their own ideas and their understanding of the world around them</p> | <p>GROUPING AND CLASSIFYING UKS2 - Compare and contrast a variety of examples linked to UKS2 PoS LKS2 - Compare and contrast a variety of examples linked to LKS2 PoS</p> | <p>QUESTIONING UKS2 - asking their own questions about scientific phenomena LKS2 - asking relevant questions</p> | <p>RESEARCH UKS2 – summarise research from a wide variety of sources and recognising that scientific ideas change and develop over time LKS2 - finding things out using a wide range of secondary sources of information</p> | <p>MODELLING using dance, drama or a visual aid to represent science in the real world</p> | <p>COLLABORATING interacting effectively as part of a group</p> |

Year Group Expectations: Year 4

| | | | | | | |
|---|--|---|---|---|---|---|
| 5 | <ul style="list-style-type: none"> Carry our fair tests and other investigations with increasing independence Suggest more than one possible prediction and begin to suggest which is the most likely. Justify their reason with some knowledge and understanding of the scientific concept Make decisions about which variables to change, measure and keep the same (linked to the appropriate units in the Y5 PoS) Make most of the planning decisions for an investigation. Recognise when it is appropriate to carry out a fair test. | <ul style="list-style-type: none"> Make their own decisions about what observations to make or measurements to use and how long to take them for (recognising the need for repeat readings on some occasions). Take measurements using a range of scientific equipment with increasing accuracy and using more complex scales / units Identify possible risks to themselves and others and suggest ways of reducing these Choose the most appropriate equipment and make accurate measurements | <ul style="list-style-type: none"> Use their developing scientific knowledge and understanding and relevant scientific language and terminology to communicate more abstract concepts (linked to Y5 PoS) Present and explain their findings through talk, in written forms or in other ways (e.g. using technology) for a range of audiences / purposes Record data and results of increasing complexity using different formats e.g. tables, annotated scientific diagrams, classification keys, graphs and models Make decisions about the most appropriate way of recording data | <ul style="list-style-type: none"> Describe straightforward patterns in results linking cause and effect e.g. using er...er or the word 'more' (e.g. <i>the longer, thinner shapes move through the water more quickly OR the larger the wings, the longer it takes the spinner to fall</i>) Look for / notice relationships between things and begin to describe these. Comment on the results and whether they support the initial prediction | <ul style="list-style-type: none"> Use their scientific K&U and appropriate scientific language and terminology (linked to Y5 PoS) to explain their findings and data and answer their initial question Draw a valid conclusion (explain why it happened) based on their data and observations (from Y5 PoS) | <ul style="list-style-type: none"> Begin to recognise how repeated readings improve the reliability of results Compare results with others and comment on how reliable they are |
| 4 | <ul style="list-style-type: none"> Carry out simple fair tests with increasing confidence investigating the effect of something on something else (linked to Y4 PoS). Start to make their own decisions about the most appropriate type of science enquiry they might use to answer scientific questions (is a fair test the best way to investigate their question?). Make a prediction based on the knowledge acquired from previous explorations / observations and apply it to a new situation Explain their planning decisions and choices Make some of the planning decisions about what to change and measure/observe. Begin to recognise when a fair test is necessary. | <ul style="list-style-type: none"> Begin to identify where patterns might be found and use this to begin to identify what data to collect Make more of the decisions about what observations to make, how long to make them for and the type of equipment that might be used. Recognise obvious risks and how to keep themselves and others safe Learn how to use new equipment, such as data loggers & measure temperature in degrees Celsius (°C) using a thermometer. Collect data from their own observations and measurements, using notes/simple tables/standard units Make accurate measurements using standard units [and more complex units and parts of units] using a range of equipment and scales | <ul style="list-style-type: none"> Record findings using relevant scientific language and vocabulary (from Y4 PoS), including discussions, oral and written explanations, notes, drawings (annotated), pictorial representations, labelled diagrams, tables and bar charts. (where intervals and ranges agreed through discussion), displays or presentations Begin to select the most useful ways to collect, record, classify and present data from a range of choices Make decisions on how best to communicate their findings in ways that are appropriate for different audiences | <ul style="list-style-type: none"> Notice/find patterns in their observations and data. (Describe the effect of something on something else) (e.g. <i>as I lengthen the ruler I notice that the pitch gets lower</i>) With some independence, analyse results / observations by writing a sentence that matches the evidence i.e. deciding the important aspect of the result and summarising in a conclusion (e.g. <i>metals tend to be good conductors of electricity</i>) | <ul style="list-style-type: none"> Begin to develop their ideas about relationships and interactions between things and explain them Use relevant scientific language and vocabulary (from Y4 PoS) to begin to say/explain why something happened | <ul style="list-style-type: none"> Use results to suggest improvements, new questions and/or predictions for setting up further tests Compare their results with others and give reasons why results might be different |
| 3 | <ul style="list-style-type: none"> Help to decide about how to set up a simple fair test and begin to recognise when a test is not fair. Make a prediction based on everyday experience With support/as a group, set up simple practical enquiries incl. comparative and fair tests e.g. make a choice from a list of a things (variables) to change when conducting a fair test. (e.g. <i>choose which magnets to compare and which method to use to test their strength</i>). As a group, begin to make some decisions about the best way of answering their qs. Find/suggest a practical way to compare things e.g. <i>rocks, magnets</i> | <ul style="list-style-type: none"> Collect data from their own observations and measurements using notes/ simple tables/standard units Help to make some decisions about what observations to make, how long to make them for, the type of simple equipment that might be used and how to work safely. Make simple accurate measurements using whole number standard units, using a range of equipment Gather data in a variety of ways to help in answering questions Use equipment accurately to improve the detail of their measurements/observations (e.g. <i>microscopes, measuring syringes, measuring cylinders, hand lenses</i>) | <ul style="list-style-type: none"> Record and present findings using simple scientific language and vocabulary from the year 3 PoS, including discussions, oral and written explanations, notes, annotated drawings, pictorial representations, labelled diagrams, simple tables, bar charts (using scales chosen for them), displays or presentations With scaffold / support record, and present data in a variety of ways to help in answering questions. Communicate their findings in ways that are appropriate for different audiences. (linked to Y3 PoS) | <ul style="list-style-type: none"> With scaffold/support, describe and compare the effect of different factors on something. (e.g. <i>we noticed that larger magnets are not always stronger</i>) With help, look for changes and simple patterns in their observations, data, chart or graph. Use their results to consider whether they met their predictions. | <ul style="list-style-type: none"> Use their experience and some evidence or results to draw a simple conclusion to answer their original question. Write a simple explanation of why things happened (using the word 'because') and using simple scientific language and vocabulary from the year 3 PoS | <ul style="list-style-type: none"> Say whether what happened was what they expected and notice any results that seem odd. Begin to recognise when a test is not fair and suggest improvements. |
| | <p>PLANNING AND TESTING UKS2 - using different types of scientific enquiry making decisions about and explaining choices for testing LKS2 - making decisions about and setting up simple practical enquiries, comparative tests and fair tests</p> | <p>USING EQUIPMENT AND MEASURES UKS2 - increasing complexity and increasing accuracy and precision make their own decisions about the data to collect LKS2 - making accurate measurements and gathering data</p> | <p>COMMUNICATING Reporting findings, recording data, presenting findings Read, spell and pronounce scientific vocabulary correctly linked to the relevant Yr Grp</p> | <p>CONSIDERING THE RESULTS OF AN INVESTIGATION / WRITING A CONCLUSION DESCRIBING RESULTS / LOOKING FOR PATTERNS UKS2 - Looking for patterns analysing functions, relationships and interactions more systematically LKS2 - Describing their findings/ results</p> | <p>EXPLAINING RESULTS UKS2 - draw conclusions based on / supported by evidence LKS2 - reporting on findings saying why something happened</p> | <p>TRUSTING RESULTS UKS2 - comment on how reliable the data is LKS2 - suggest improvements for further tests</p> |
